

the lucky punch

biography

Like musical alchemists, The Lucky Punch have forged a name for themselves in the underground rock 'n' roll scene since the release of their debut album "Kick Up A Hullabaloo" in 2004.

Their varied, old school rock sound deeply influenced by the wildest bands of the 60s & 70s strikes a refreshingly different chord in the nowadays rock scene and the Lucky Punch have proven their musical chops while sharing the stage with such scene greats as Monster Magnet, Motorhead, the Hellcopters and the Hives. This Munich four piece developed their energetic and skilled showmanship through playing shows and touring in Germany, Sweden, Spain, France, Czech Republic, Switzerland, Italy and Austria sharing the stage with many of the scene's luminaries, the Flaming Sideburns among others. In 2005 they released their second album "Join Our Cruise" and started touring China in december 2005.

They enjoyed a successful three week tour to insanely receptive crowds, video documentary of which is available on Youtube.

On "Yield to Temptation" they found their own unique style and sound, far removed from the common musical clichés pandemic in the scene.

The new album "Still Shakin" demonstrates a wide range of influences from classic blues to infernal rock 'n' roll, with higher caliber composition skills that will get your adrenalin flowing and your heart racing.
